

Sustainability and Environmental Stewardship

Emphasizing our strong ESG program and the environmental benefits of our pallet solutions showcases 48forty Solutions as a leader in sustainable pallet management. By reusing pallets up to 15 times and prioritizing responsible practices, we offer our customers the opportunity to make a positive impact on the environment while optimizing their supply chain operations.

Strong ESG Program

- Our business is built on sustainability. At 48forty Solutions, we take sustainability seriously and have a robust Environmental, Social, and Governance (ESG) program in place. Our commitment to ESG extends beyond just recycling pallets; we strive to make a positive impact on the environment and the communities we serve.

Reducing Environmental Footprint

- By recycling and reusing more than 92% of wooden pallets we handle, we significantly reduce the demand for new wood resources, leading to a lower environmental footprint. Choosing recycled pallets over new ones helps conserve natural resources, promoting a circular economy and reducing waste.

Extended Pallet Life Cycle

- Our pallets are designed and constructed to be durable and long-lasting, allowing them to be reused multiple times while maintaining performance. A single pallet can be reused up to 15 times, prolonging its life cycle and minimizing the need for new pallet production.

Environmental Product Declaration (EPD)

- Our wooden pallets have been awarded the Environmental Product Declaration, certifying their eco-friendly nature and sustainable properties. This declaration provides our customers with transparent information about the environmental impact of our pallets.

Lower Carbon Footprint

- Choosing recycled pallets not only conserves wood resources but also helps reduce carbon emissions associated with new pallet production. By opting for our sustainable pallet solutions, businesses can contribute to a greener supply chain and lower their overall carbon footprint.

Environmental Impact Calculator

- We offer an Environmental Impact Calculator, allowing customers to see the positive impact of switching to recycled pallets. This tool provides valuable insights into the environmental benefits of using sustainable pallets, fostering a commitment to responsible choices.

Sustainable Partnership

- When partnering with 48forty Solutions, businesses align with an environmentally responsible company that values sustainable practices. By incorporating our recycled pallets into their supply chain, customers demonstrate their commitment to environmental stewardship.

Promoting a Greener Future

- Our dedication to sustainability extends to all aspects of our operations, from efficient logistics to waste reduction initiatives. By choosing 48forty Solutions, businesses actively contribute to a greener future, positively impacting the environment and their bottom line.
