

Why Recycled?

Pallet Management Made Simple

A Sustainability Case Study

COST

Low acquisition and management cost facilitates operational savings

CLIMATE

Eco-friendly raw materials + availability of recycled lumber = low production carbon footprint

RAW MATERIALS

Renewable resource, well-documented sustainable resource management practices

END OF LIFE

Used wood pallets are torn down and used to repair pallets or ground into wood mulch

REPAIRABILITY

Easily repaired

HYGIENE

Easily sanitized using chemical-free methods

CIRCULARITY

100% recyclable - from the nails to the lumber

DURABILITY

Sturdy construction facilitates reuse

Zero Waste Means Minimal Cost

Over

90% of Materials

we receive are turned back into durable, high-quality pallets

Up to

35% Reduced Costs

diverted from landfills annually

Yielding

10.5M Tons of Resources

diverted from landfills annually
